Dev Labor

What Is GrantOrb?

GrantOrb UA is a fully deployed, bilingual (EN/UK) AI SaaS platform that helps Ukrainian organizations and individuals discover, match, and apply for international grants. It aggregates EU, USAID, World Bank, EBRD, bilateral, and national grant opportunities — then uses a multi-layer AI engine to rank them by fit and generate structured applications.

The Problem It Solves

- Ukrainian organizations face a fragmented, overwhelming landscape of international grants
- No centralized platform aggregates opportunities AND understands applicant nuances
- No intelligent tool helps translate a profile into a scored ranking of best-fit grants
- Grant consultants waste hours manually searching and drafting — GrantOrb automates both

Vision & Expansion Potential

GrantOrb is architecturally designed to become a universal global platform — not just for grants.

Expand beyond grants to cover:

- Tenders & procurement (EU, national, municipal)
- Accelerators & incubators (global programs, Y Combinator, Techstars, etc.)
- Scholarship & fellowship programs worldwide
- International mobility & residency programs
- R&D & innovation programs (Horizon Europe, DARPA, etc.)

Applicant types already supported — and more can be added in days:

Business

Startup

NGO

Researcher

Student

Public Sector

Consultant

Roadmap additions: Journalist, Diaspora Organization, Agricultural Cooperative, Cultural Institution, Relocant, Media Org — any archetype can be added in 2–3 days.

Addressable Markets

Immediate	Near-term	Global
Ukrainian SMEs, NGOs, startups, researchers, students seeking EU/international funding	Central & Eastern Europe — Poland, Moldova, Georgia, Balkans with similar grant landscapes	Any country with active grant ecosystem — adapt language, grant sources, applicant types

Complete Feature Inventory

Feature	Complexity	Status

AI Engine — Technical Highlights

AI Matchmaker V2

8-dimension weighted scoring pipeline:

- Sector Fit (30%) — industry + thematic alignment
- Readiness Fit (18%) — profile completeness signals
- Funding Fit (15%) — multi-currency budget overlap
- Applicant Type Fit (10%) — 3-layer matching
- Project Stage Fit (9%) — maturity alignment
- Eligibility Gate (8%) — rule-based pass/fail
- Geography Fit (7%) — region + EU awareness
- Company Size Fit (3%) — employee validation

Also: OpenAI embeddings for semantic pre-filtering + Groq LLM re-ranking layer + confidence scoring + human-readable explanations.

AI Grant Writer

6-layer intelligence engine:

- Anti-hallucination scanner (validates all claims)
- Identity reframing (6 company profiles)
- Tone calibration (4 modes: corporate / academic / authentic / impact-first)
- 10 category-specific narrative strategies
- 5 structural output templates
- Missing info detection + iterative follow-up mode

Model: Groq Llama-3.3-70b-versatile with multi-key fallback for 99.9% uptime.

Current State & What's Included

What you get

- Full source code (GitHub repo, private)
- Live deployed platform at grantorb.com.ua
- Supabase database with 900+ grants + embeddings
- Stripe billing infrastructure (ready to activate)
- .com.ua and .online domains with brand assets
- All AI integrations (OpenAI, Groq) configured
- Resend email system

Stage & monetization

- Soft launch / Early Access — live and publicly accessible
- Pre-revenue — Stripe in Safe Mode (intentional, easy to flip on)
- Billing tiers defined: Free / Starter / Pro / Business
- AI usage quota system fully built
- Zero technical blockers to monetization — flip one flag and go

Valuation — Why \$5,000 Is an Exceptional Deal

Cost to rebuild from scratch

940–1,380 hours of senior developer time

At market rates (\$50–\$80/hr):

Asking price

Everything above — today, functional, deployed

\$5,000

\$47,000 – \$110,000

6–9 months solo or 3–5 months with 2 devs

~4–10% of rebuild cost

Estimated fair market value as-is: \$25,000–\$65,000

After adding automated grant ingestion + SEO public directory (12–18 days of work):

Post-improvement fair value: \$55,000 – \$120,000

With 50–100 paying users (\$500–\$1,000 MRR): \$100,000 – \$250,000
